October 14th, 2016

Dear Stakeholder:

TransGas Limited (TransGas), a wholly-owned subsidiary of SaskEnergy Incorporated, a Saskatchewan Crown Corporation, has identified the recipient of this letter as a potential stakeholder for TransGas' proposed Regina Pipeline Expansion project and would like to present an opportunity to discuss the project.

TransGas is proposing to build an approximately 85 kilometer natural gas transmission pipeline around the City of Regina. The proposed pipeline is necessary to accommodate future residential, commercial and industrial growth in Regina and the surrounding areas. The pipeline would begin at an existing point on our system near the community of Rowatt and continue northwest around Regina, before returning south and tying into our system east of Regina near Highway 33. The Rural Municipalities in the project area include: RM of Sherwood (No. 159) and the RM of Edenwold (No. 158).

Keeping our stakeholders informed is an important aspect of all of our major projects. We have an investment in Saskatchewan, and believe very strongly in working together with communities and stakeholders when projects such as this are planned.

TransGas will be holding two public Open Houses, where we will explain the proposed project in more detail, including the possible pipeline route(s), pipeline safety, environmental protection and the planning, construction and operation practices that will be used to minimize environmental impact. We will also be available at this time for public comments and feedback.

- **Monday, November 7th, 2016**
  Pilot Butte Community Hall. 222 Diamond Place, Pilot Butte
  9:00 a.m. to 8:00 p.m.

- **Tuesday, November 8th, 2016**
  Sherwood Forest Golf & Country Club, Salon A. RR2, Regina
  9:00 a.m. to 8:00 p.m.

If you have any questions about the proposed project, please contact TransGas at 1-844-295-9517, or email landservices@transgas.com.

Sincerely,

Ray Lagimodiere,
Pipeline Engineering
