Dear Neighbor,

RE: SaskEnergy Incorporated – Intermittent Flare Notification – Regina North Expansion at the NW-01-17-19-W2M Block Valve Location and SaskEnergy Town Border Station (TBS) in the R.M. of Sherwood No. 159

Please be advised that SaskEnergy Incorporated, SaskEnergy, a Saskatchewan Crown Corporation, is planning to complete a scheduled intermittent flaring at the above location. The flares are in conjunction with the current project work taking place in the Regina area.

The flares will be conducted between **Tuesday, June 11 and Thursday, June 13, 2024,** at the existing SaskEnergy block valve, which is located adjacent (east side) of the Saskatchewan Ministry of Highways Regina By-Pass and Highway 33 (north side), within the R.M. of Sherwood and on the existing SaskEnergy Town Border Station (TBS) property. While the infrastructure is isolated from the rest of the system, flaring is required to remove the remaining gas prior to work commencing. Flaring is an industry standard procedure when natural gas needs to be released from a gas line and reduces the carbon footprint of the vented natural gas by 85 per cent. For more information regarding flaring and its purposes, please refer to the SaskEnergy video at the following link SaskEnergy Spotlight: Natural Gas Flaring.

The proposed schedule for the intermittent flaring will start at approximately **8:00am**, **June 11, 2024,** with the intermittent flares being conducted for the duration of the work, which is subject to change based on operating requirements. Please note there will be no interruptions to existing residential, commercial, or industrial gas services during these activities.

Scheduled work on our facilities and infrastructure supports the safe and reliable delivery of natural gas to all customers. All proposed work is being conducted in accordance with industry best practices and complies with associated provincial regulations.

We appreciate your patience and cooperation with this scheduled work. If you have any questions or concerns regarding the work or the proposed schedule, please contact me at 306-570-1546 or wgoodwin@saskenergy.com.

Sincerely,

Wade Goodwin
Land & Public Awareness Coordinator, SaskEnergy Incorporated
