

October 2, 2020

Rural Municipality of Sherwood No 159
PO Box 40029 Grasslands PO
Regina, SK
S4W 0L3

Dear Waterworks Owner/Operator:

This letter is to advise you that a **Precautionary Drinking Water Advisory (PDWA) will be placed on 2191 and 2111 Albert Street North (ONLY), in the RM of Sherwood No 159's Regina North Industrial subdivision water distribution system, and is effective October 2, 2020 at 8:00am until further notice.**

Water Security Agency protocol, in consultation with Saskatchewan Health Authority, is to place water distribution systems under a PDWA when water distribution system maintenance results in a localized depressurization until such a time as the water within the entire water distribution system is proven safe for human consumptive use. This PDWA remains in effect until the safety of the RM of Sherwood's distributed water can be ensured. Therefore the administration shall notify all affected users of the portion of the drinking water distribution system of the conditions in the attached PDWA.

This advisory can be rescinded following:

- 1) The water distribution switch over has been completed, and all related appurtenances have been disinfected and flushed according to applicable standards and the affected distribution system has been pressurized, and flushed, according to applicable standards.
- 2) The plant is producing water that achieves the water quality limits stated in the facility's Permit to Operate a Waterworks.
- 3) The receipt of two consecutive single (2 total) bacteriological samples, collected 24 hours apart, which are negative for bacteriological growth in the water being supplied throughout the distribution system. Samples are to be marked as "Other" and labeled with the appropriate station number. These samples will not count towards sampling compliance.

Thank you for your cooperation in this regard. For further information please do not hesitate to contact the undersigned at (306) 539-4188 or don.turner@wsask.ca.

Sincerely,

A handwritten signature in black ink that reads "Don Turner".

Precautionary Drinking Water Advisory

This Advisory applies to businesses and users of 2191 & 2111 Albert Street North (ONLY) in the RM of Sherwood No 159's Regina North Industrial Subdivision's water distribution system, and is effective on October 2, 2020 at 8:00 am.

Pursuant to clause 36(1)(a) of *The Environmental Management and Protection Act 2010* this Precautionary Drinking Water Advisory is issued due to a water system maintenance resulting in a localized depressurization and therefore the safety of the drinking water supply cannot be ensured at all times. Therefore, pursuant to Clause 36(1)(b) of *The Environmental Management and Protection Act 2010*, consumers must be notified to:

- (a) boil all water, used for drinking purposes, for at least one (1) minute, at a rolling boil, prior to use;
- (b) boil water to be used for other activities where it may be ingested, including:
 - (i) brushing teeth or soaking false teeth;
 - (ii) dishwashing, unless sanitized in another fashion;
 - (iii) washing fruits and vegetables;
 - (iv) food or drink which will not be subsequently heated; and
 - (v) ice cubes;
- (c) not drink from any public drinking fountains supplied with water from the public water supply;
- (d) under most circumstances, not need to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Laundry may be washed in tap water, either by hand or by machine.
- (e) ensure that younger children and infants are sponge bathed;
- (f) use an alternative water source known to be safe, if they do not wish to boil the water; and
- (g) consult with your physician if you have cuts or rashes that are severe before using the water.

Under most circumstances, there is no need to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Laundry may be washed in tap water, either by hand or by machine.

This Advisory is effective on the **date and time listed above**, and will not be lifted until the water supply is determined to be completely safe.
